

Nama : Putri Norchasana  
Kelas(No) : TI-2H (24)  
NIM : 2241720036  
Tugas : Jobsheet 9

1. Pertama ubah auth untuk menyimoan username dan model

```
'providers' => [  
    'users' => [  
        'driver' => 'eloquent',  
        'model' => App\Models\UserModel::class,  
    ],  
],
```

2. Buat middleware cek\_login

```
class Cek_login  
{  
    /**  
     * Handle an incoming request.  
     *  
     * @param \Closure(\Illuminate\Http\Request): (\Symfony\Component\HttpFoundation\Response) $next  
     */  
    public function handle(Request $request, Closure $next, $roles): Response  
    {  
        //cek sudah login atau belum . jika belum kembali ke halaman login  
        if (!Auth::check()) {  
            return redirect('login');  
        }  
  
        $user = Auth::user();  
  
        if($user->level_id==$roles){  
            return $next($request);  
        }  
  
        return redirect('login')->with('error', 'Maaf anda tidak memiliki akses');  
    }  
}
```

3. Registrasikan middleware cek\_login pada kernel

```
protected $middlewareAliases = [  
    'auth' => \App\Http\Middleware\Authenticate::class,  
    'auth.basic' => \Illuminate\Auth\Middleware\AuthenticateWithBasicAuth::class,  
    'auth.session' => \Illuminate\Session\Middleware\AuthenticateSession::class,  
    'cache.headers' => \Illuminate\Http\Middleware\SetCacheHeaders::class,  
    'can' => \Illuminate\Auth\Middleware\Authorize::class,  
    'guest' => \App\Http\Middleware\RedirectIfAuthenticated::class,  
    'password.confirm' => \Illuminate\Auth\Middleware\RequirePassword::class,  
    'precognitive' => \Illuminate\Foundation\Http\Middleware\HandlePrecognitiveRequests::class,  
    'signed' => \App\Http\Middleware\ValidateSignature::class,  
    'throttle' => \Illuminate\Routing\Middleware\ThrottleRequests::class,  
    'verified' => \Illuminate\Auth\Middleware\EnsureEmailIsVerified::class,  
    'cek_login' => \App\Http\Middleware\Cek_login::class,  
];
```

4. Buat controller untuk authentication

```

<?php

namespace App\Http\Controllers;

use App\Models\UserModel;
use Dotenv\Validator;
use Illuminate\Http\Request;
use Illuminate\Support\Facades\Auth;
use Illuminate\Support\Facades\Hash;
use Illuminate\Support\Facades\Redirect;
use Illuminate\Support\Facades\Validator as FacadesValidator;

class AuthController extends Controller
{
    //
    public function index()
    {
        $user = Auth::user();
        if ($user) {
            if ($user->level_id == '1') {
                return redirect()->intended('admin');
            } else if ($user->level_id == '2') {
                return redirect()->intended('manager');
            }
        }
        return view('login');
    }

    public function proses_login(Request $request)
    {
        $request->validate([
            'username' => 'required',
            'password' => 'required'
        ]);
    }

```

```

        $credential = $request->only('username', 'password');
        if (Auth::attempt($credential)) {
            $user = Auth::user();

            if ($user->level_id == '1') {
                return redirect()->intended('admin');
            } else if ($user->level_id == '2') {
                return redirect()->intended('manager');
            }
            return redirect()->intended('/');
        }

        return redirect('login')
            ->withInput()
            ->withErrors(['login_gagal'=> 'Pastikan kembali username dan password yang dimasukkan sudah benar']);
    }

    public function register(){
        return view('register');
    }

```

```

    public function register(){
        return view('register');
    }

    public function proses_register(Request $request){
        $validator = FacadesValidator::make($request->all(),[
            'nama' => 'required',
            'username' => 'required|unique:m_user',
            'password' => 'required'
        ]);

        if($validator->fails()){
            return redirect('/register')
                ->withErrors($validator)
                ->withInput();
        }

        $request['level_id'] = '2';
        $request['password'] = Hash::make($request->password);

        UserModel::create($request->all());
        return redirect()->route('login');
    }

    public function logout(Request $request){
        $request->session()->flush();
        Auth::logout();
        return Redirect('login');
    }
}

```

##### 5. Tambahkan route

```

Route::get('login2', [AuthController::class, 'index']) ->name('login');
Route::get('register2', [AuthController::class, 'register']) ->name('register');
Route::post('proses_login', [AuthController::class, 'proses_login']) ->name('proses_login');
Route::get('logout', [AuthController::class, 'logout']) ->name('logout');
Route::post('proses_register', [AuthController::class, 'proses_register']) ->name('proses_register');

Route::group(['middleware' => ['auth']], function () {
    Route::group(['middleware' => ['cek_login:1']], function () {
        Route::resource('admin', AdminController::class);
    });
    Route::group(['middleware' => ['cek_login:2']], function () {
        Route::resource('manager', ManagerController::class);
    });
});

```

##### 6. Buat tampilan login

```

1  @extends('adminlte:auth-page', ['auth_type' => 'login'])
2
3  @section('adminlte_css_pre')
4  <link rel="stylesheet" href="{{ asset('vendor/icheck-bootstrap/icheck-bootstrap.min.css') }}">
5  @stop
6
7  @php( $login_url = View::getSection('login_url') ?? config('adminlte.login_url', 'login') )
8  @php( $register_url = View::getSection('register_url') ?? config('adminlte.register_url', 'register') )
9  @php( $password_reset_url = View::getSection('password_reset_url') ?? config('adminlte.password_reset_url', 'password/reset') )
10
11  @if (config('adminlte.use_route_url', false))
12  @php( $login_url = $login_url ? route($login_url) : '' )

```

## 8. Buat tampilan admin

```

1  @extends('layouts.app')
2
3  {{-- Customize layout sections --}}
4
5  @section('subtitle', 'Admin')
6  @section('content_header_title', 'Home')
7  @section('content_header_subtitle', 'Admin')
8
9  @section('content')
10 <div class="container">
11     <div class="card">
12         <div class="card-header">Tampilan <?php
13
14 use Illuminate\Support\Facades\Auth;
15
16 echo (Auth::user()->level_id == 1) ? 'Admin' : 'Manager'; ?></div>
17         <div class="card-body">
18             <h1>Login Sebagai:
19                 <?php echo (Auth::user()->level_id == 1) ? 'Admin' : 'Manager'; ?>
20             </h1>
21             <a href="{{ route('logout') }}">Logout</a>
22         </div>
23     </div>
24 </div>
25 @endsection
26
27 @push('js')
28 @endpush

```

## 9. Buat tampilan manager

```

@extends('layouts.app')

{{-- Customize layout sections --}}

@section('subtitle', 'Manager')
@section('content_header_title', 'Home')
@section('content_header_subtitle', 'Manager')

@section('content')
<div class="container">
    <div class="card">
        <div class="card-header">Tampilan <?php

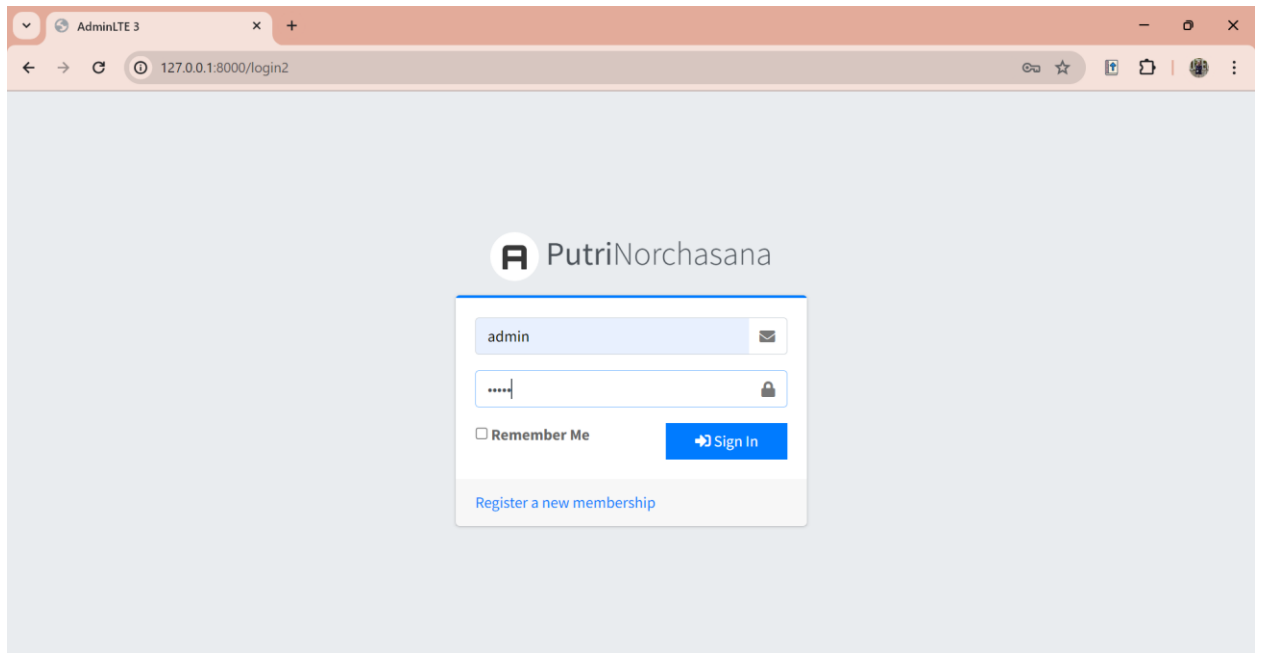

use Illuminate\Support\Facades\Auth;

echo (Auth::user()->level_id == 1) ? 'Admin' : 'Manager'; ?></div>
        <div class="card-body">
            <h1>Login Sebagai:
                <?php echo (Auth::user()->level_id == 1) ? 'Admin' : 'Manager'; ?>
            </h1>
            <a href="{{ route('logout') }}">Logout</a>
        </div>
    </div>
</div>
@endsection

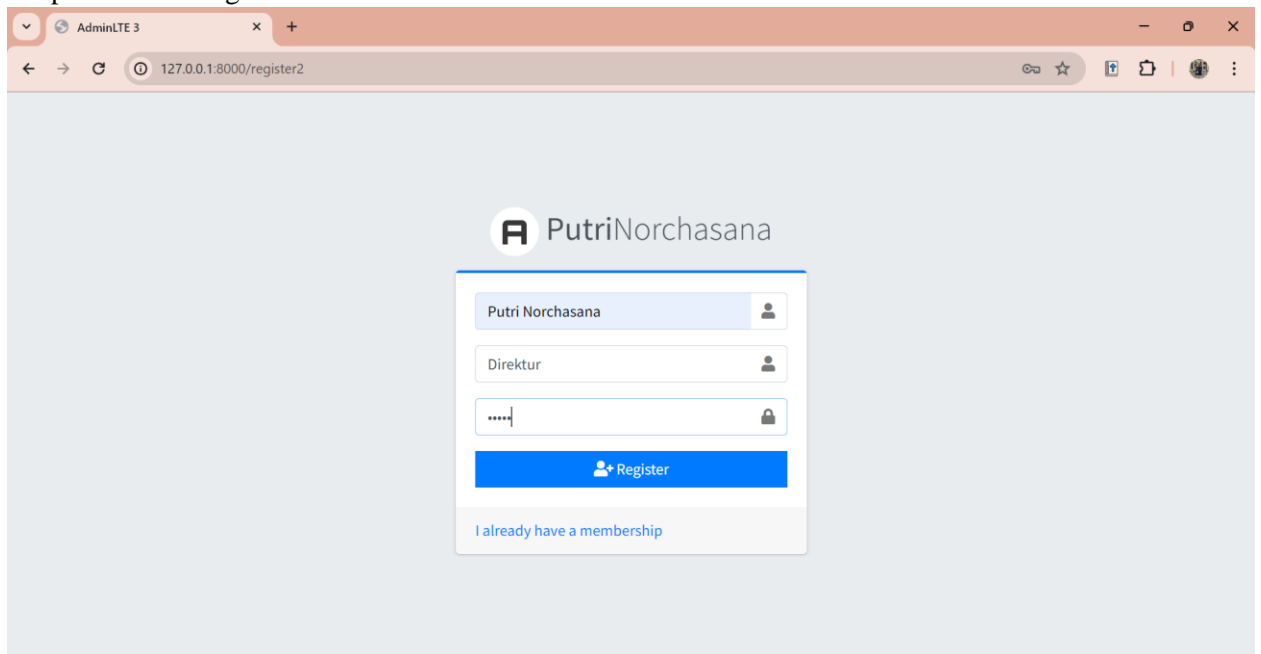

@push('js')
@endpush

```

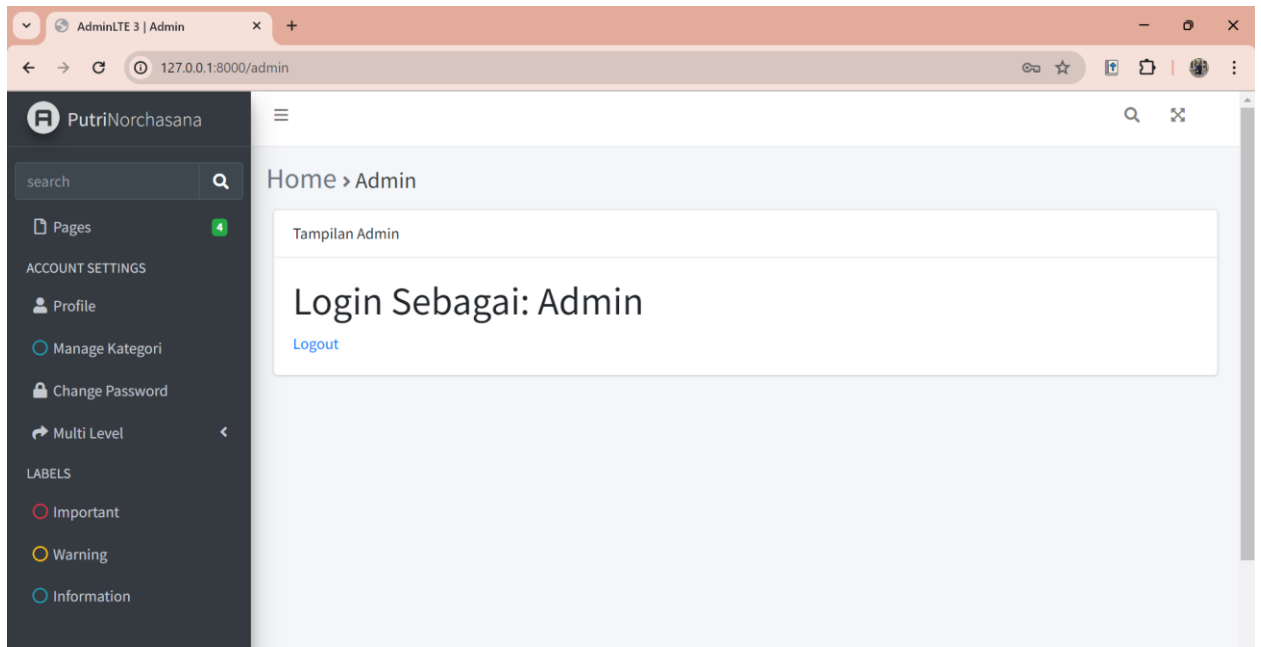

## 10. Output halaman login

11. Output halaman register

12. Output halaman admin

### 13. Output halaman manager
